

General Background

- High-fidelity prototype mobile scenario is about an assignment reminder app
- App name is Edu Alert
- Basic idea of an app to help set reminder for courses and their assignments

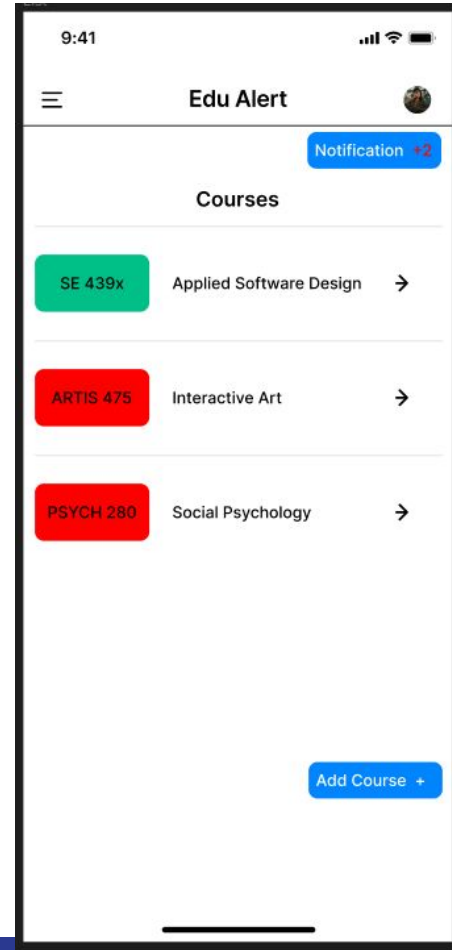

Scenario of Use

Signing into Edu Alert can be set up with just an email and password or the use of Google login feature

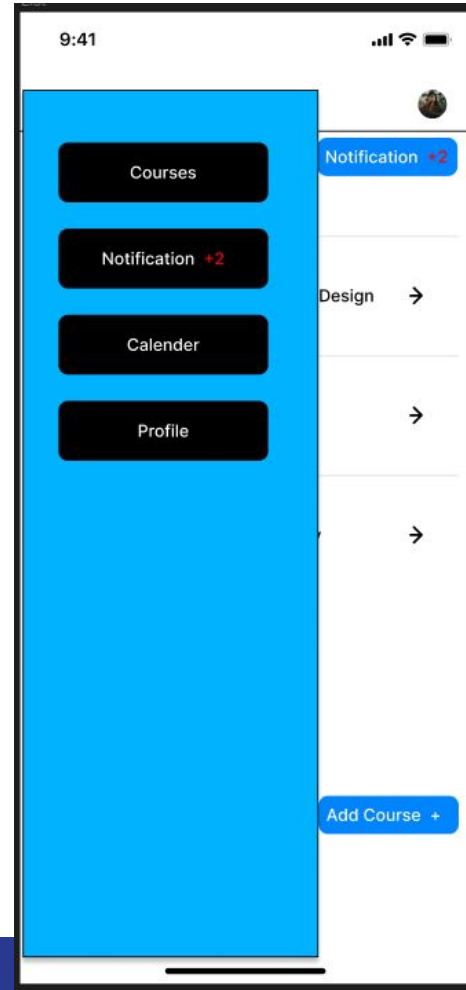

Scenario of Use (Cont.)

After signing in the user is led to the home page. Displaying the courses they have added to the app. Also allowing the user to add more courses if necessary. Top right display a notification bar and how many notification are not read yet. Top left shows menu selections.

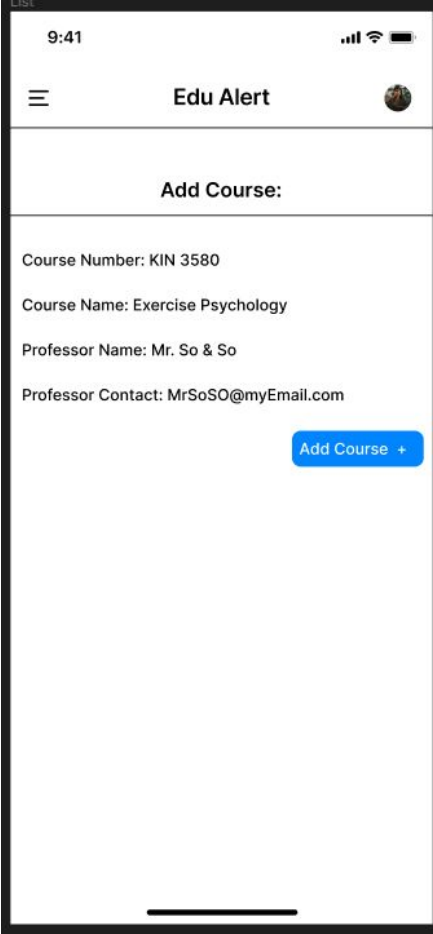

Scenario of Use (Cont.)

The navigation menu will lead the user to just a sidebar menu displaying the homepage (courses), notification, calendar, and profile

Scenario of Use (Cont.)

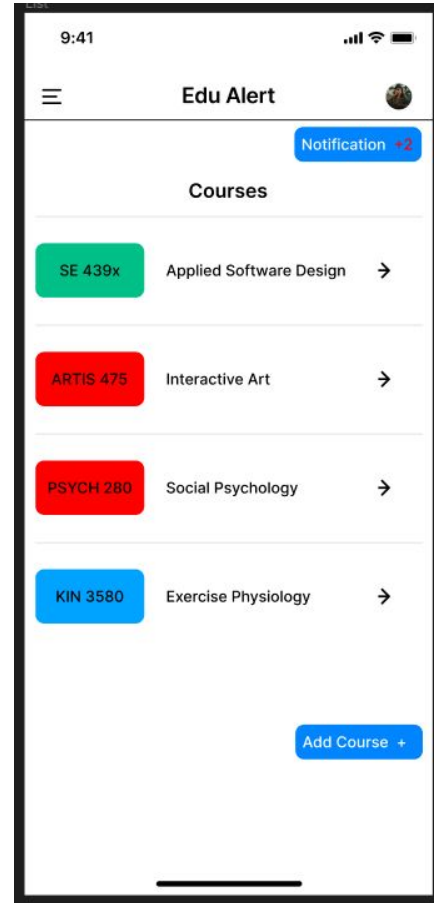

If the user click to add a course it will lead them to this page to add description of the course. Like the number, name, professor infos. Confirming the course being added with the blue button.

The image shows a mobile application interface for adding a course. At the top, the status bar displays the time 9:41, signal strength, and battery level. The app's header bar is white with a hamburger menu icon on the left, the title "Edu Alert" in the center, and a profile picture icon on the right. Below the header, the section "Add Course:" is highlighted. The form contains four text input fields: "Course Number: KIN 3580", "Course Name: Exercise Psychology", "Professor Name: Mr. So & So", and "Professor Contact: MrSoSO@myEmail.com". A blue button with the text "Add Course +" is positioned at the bottom right of the form. The bottom of the screen shows a black home indicator bar.

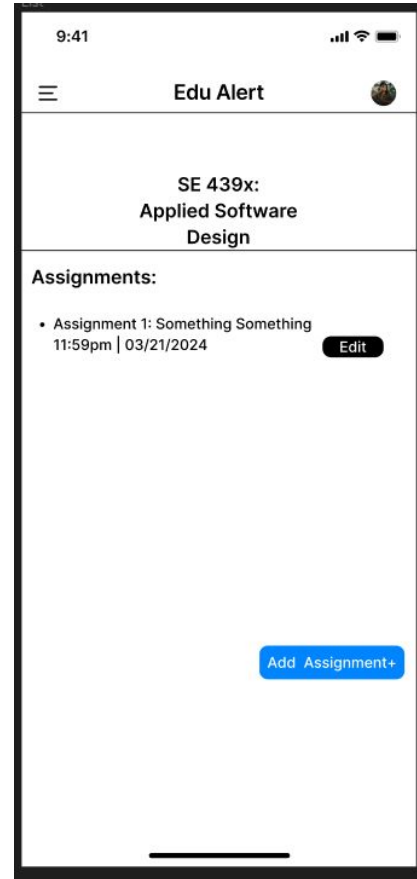

Scenario of Use (Cont.)

After adding the course it will show up on the homepage/course page.

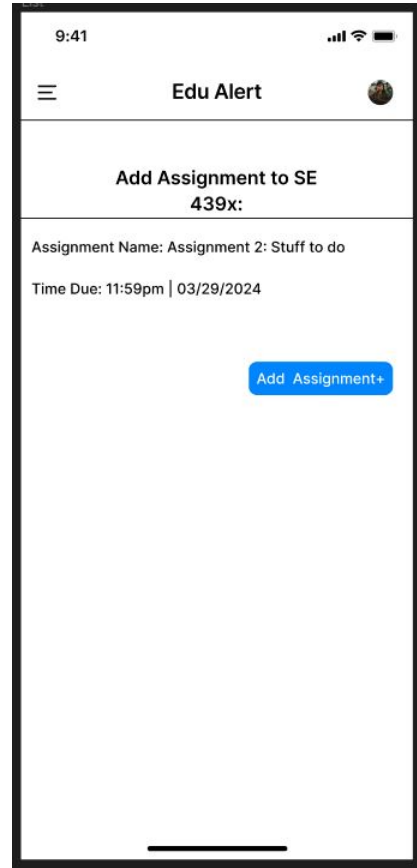

Scenario of Use (Cont.)

If the user clicks on one of their courses it will lead them to that course page. Displaying their assignments they added to that course. They are allowed to edit assignments already created or add a new assignment.

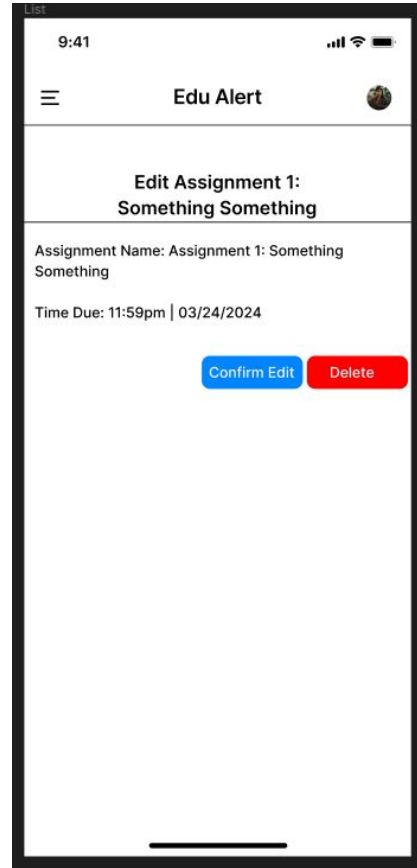

Scenario of Use (Cont.)

If the user add an assignment it will lead them to a new page. Allowing them to add info for that assignment. Like the name of the assignment and the time and date that it is due. Confirming the added assignment with the blue button.

Scenario of Use (Cont.)

If the user wanted to edit an assignment it will lead them to this page. Already having the previous info added. Like name and time and date. The user is allowed to edit those info if needed or delete the assignment with the red button. If not deleted they can confirm the edit with the blue button.

Scenario of Use (Cont.)

Lastly if the user clicks on the Notification button on the homepage/courses or in the navigation bar, it will lead them to this page. Showing upcoming assignment that are due today. Once satisfied with reading the information they can clear the message with the black button.
